- Acquire the skills to paint effectively with oil paint
- Gain a sense of composition
- Paint alongside Michelangelo in a studio setting like atelier

Learning to paint in oil is an aspiration many of us have and yet it can seem quite daunting at times. There are so many variables and early attempts often end up in a poorer mess. What is required is a broad understanding of the practicalities and a clear set of steps to take to arrive at painting we are happy with.

Michelangelo's approach starts with a series of questions about what we see, a curiosity about the shape of volume, tone and edge out of which emerges the division of form. He will teach us a method that grows from the abstract qualities of what we see. As such it is suitable for beginners and those wishing to refine their technique.
